Supplement Fig. 1. Weighted standardized mean diff (with 95% confidence interval [CI]) of several cognitive domains at end point in randomized controlled trials when the whole population was considered. (A) Attention/working memory; (B) Executive function; (C) Language; (D) Verbal memory (immediate recall); (E) Verbal memory (delayed recall); (F) Visual memory; (G) Visuomotor ability; (H) Visuospatial ability. Std: standard deviation, diff: difference.
Supplement Fig. 1. Continued.
